Subject: I passed

Paul,

Just got home from Orlando , and thought I'd drop a note to let you know I passed all three parts.

Thank you very much for your tutelage .

The point you made about the point of operation was quite helpful , however there is a lest just below et en the osha manual listing machine with such points. I had seen them there when you pointed the subject above, but you may want to point the lest to future students, as my experience tells me there might be a question of that very nature .

Thanks again for the help . You're quite good at teaching this stuff .

Patrick Curnow

P.S. this was my first attempt at the test
